

THE WRANGELL SENTINEL

VOL. XVI. NO. 30

WRANGELL, ALASKA, THURSDAY, JULY 19, 1917

PRICE TEN CENTS

CABLE NEWS

Seattle—Corporation counsel this afternoon petitioned Superior Judge Tallman for an alternative writ of mandate compelling traction company within 24 hours to begin and continue to operate cars; also in case of failure of demand that receiver be appointed to take charge and operate.

Washington—It has been definitely decided to hold the drawing at 9:30 tomorrow in the Senate building.

Seattle, July 19.—The district attorney in his opening address charged Mrs. Mooney with being a slaughterer of women and children.

Kansas City, July 19.—Three Germans were arrested in Kansas town selling court plaster on which were declared to be according to government tests fatal disease inoculations.

London, July 17.—Twenty-six British vessels were torpedoed during the week ending last night.

Washington, July 17.—The American fleet has doubled since it was ordered reorganized.

Washington, July 17.—Representatives of Carranza in Washington are today making a determined effort to get the embargo on arms and munitions to Mexico lifted.

Washington, July 19.—It has been practically decided to hold the army drawing at ten tomorrow. The States of New York and Pennsylvania failed to complete exemption board organization.

Washington: The allies have invited the United States to join the inter-allies war council at Paris. It is understood the government does not consider it necessary to send representatives.

Paris: The Germans attacked front of 800 meters south of St. Quentin and gained a footing on first line.

Petrograd: The Russians captured Novicia, but withdrew to the east at the end of the village.

Washington—National impatience at delay caused by the Geothals-Denman row broke out today in the Senate when a resolution was introduced demanding from the president full information about this fight.

Petrograd—The general feeling here is that a decisive stage has been reached in Russian affairs. Cannon are being posted about all the State building and the winter palace which is now the seat of government.

JUNEAU, July 16.—In the special election held today Juneau and Douglas went wet nine to one.

Seattle, July 17.—The mayor declared that if the operation of street cars is not resumed the city may ask for the appointment of a receiver for the lines and operate them itself.

Seattle, July 17.—J. C. Nash, a Wells Fargo guard, when called a scab by striking express drivers, fired into the crowd wounding two.

Olympia, July 17.—The supreme court ruled that the picketing of places of business by strikers is unlawful.

Paris, July 17.—The French offensive on the left bank of the Meuse captured German positions along a mile front.

Seattle, July 17.—If the striking street car employees are not back to work by Friday noon the Company will proceed to operate with non-union men.

Washington, July 17.—Sixteen woman suffragists were sentenced to sixty days in the workhouse for picketing the white house.

Seattle, July 17.—Masked robbers entered the home of Ben Pincus early this morning and bound Mrs. Pincus and two half grown children and awaited the return of Ben whom they bound and robbed of \$108 and then escaped. During the hour spent awaiting the return of Ben the robbers drank a quart of whiskey which they found in the house.

Seattle, July 17.—It is estimated that 25,000 lumber workers and shingle weavers are on a strike throughout the state. A strike of the Seattle shipyard employees is threatened August 1 in sympathy. The metal workers are demanding more pay. The federal conciliators are trying to prevent a strike in this line.

Washington, July 17.—Indications point to Thomas Riggs for the Alaska governorship. He is said have the support of Chairman McCormick. There is much uncertainty as to the date of appointment.

Accident at Lake Bay

Roger Plummer, brother-in-law of Frank S. Barnes, met with an accident at Lake Bay last week. Mr. Plummer was examining a salmon on the cannery wharf when he slipped and fell, striking his head on a fish pugh. He remained unconscious after the fall and efforts of anxious friends and relatives at the cannery failed to revive him. Within a few hours he was hurried to Ketchikan where he received medical aid. The physician who dressed the wound stated that it came near being of a serious nature, since the bruise verged on the temple.

M. L. Burke who was in Wrangell Monday reported that Mr. Plummer has returned to the cannery and is improving rapidly.

M. B. Dahl came in last week on the Shamrock III. Fish are not plentiful and competition is keen at present, from his report. Prices are excellent and the market remains good for all that trollers can furnish. Mr. Dahl left again for Port Alexander a few days ago.

Louis and Walter Larson who have been trolling for about six weeks in Chatham straits and vicinity came to town last week during the mild weather.

Watch for the date of the big serial photoplay entitled GRAFT. Coming to the Photoshow soon.

There were 66 raw recruits aboard the Dolphin yesterday afternoon en route to Ft. Wm. H. Seward. During the week another vessel had 59 raw recruits aboard for the same destination.

Mr. and Mrs. G. H. Davis arrived from Proctor, Vermont, on the Grand Trunk vessel this morning. Mr. Davis is general superintendent of the Vermont Marble Works, and will leave tomorrow for a short business trip to Tokeken.

The Guild of St. Philip's Church met with Mrs. Oscar Carlson, about fifteen ladies, including several visitors being present. After the meeting delicious refreshments consisting of cream cake and tea were served.

For the shave and hair cut or satisfaction go to Ed Grigwire in the Weber block.

Recruiting Officer Has Papers Stolen

A theft of a most serious nature occurred in Petersburg Saturday night when a parcel of papers belonging to Lieut. C. C. Clark, a naval recruiting officer, were stolen from the hotel.

The papers had no monetary value, but their loss stopped the work of recruiting until they were recovered.

As soon as it became known that the theft had occurred the marshal and several loyal citizens got busy on the case but were unable to get the slightest clue.

Being unable to proceed with the work of recruiting with his records and blanks gone Lieut. Clark and party proceeded to Ketchikan. Shortly after his arrival in Ketchikan Lieut. Clark received a cable message advising him that the stolen property had been recovered, and he at once returned to Petersburg.

The alleged thief is a man named James O'Donnell, who claimed that he was under the influence of liquor and thought he was taking his laundry. The Petersburg laundryman stated that O'Donnell had never had anything laundered in his laundry. O'Donnell is of the I.W.W. type. He served a jail sentence in Juneau last year, and later was in trouble in Ketchikan. When O'Donnell gets through with this case he will probably be able to distinguish between a bundle of laundry and a parcel of government papers, whether he is drunk or sober.

The seriousness of the offense is indicated when it is known that a failure to recover the stolen property might have resulted in the War Department closing the port of Petersburg until after the war.

Miss Katharine Bronson has organized two gymnasium classes. The young women's class meets Thursday evening of each week at St. Philip's Gymnasium for instruction in regular class room work, calisthenics and folk dancing. Monday evening at 8 P.M. is devoted to basketball practice at the skating rink. The matrons club will meet each Friday evening for general instruction in physical culture at St. Philip's Gymnasium.

Mrs. G. H. Barnes and Mrs. O. A. Brown entertained at the home of Mrs. Brown Tuesday afternoon. About twenty-five ladies were present. Progressive hearts formed the amusement, first prize being awarded to Mr. A. B. Pennycook while Mrs. W. J. Pigg received the consolation. Baskets of ferns and flowers decorated the tables on which dainty refreshments were served.

BORN, To Mr. and Mrs. James Bradley on Tuesday, July 17, 1917, a girl.

Mrs. Fred Brevier has rented a suite of rooms over the post office and announces that she will open an up to date ladies' tailoring business.

The Uncle Dan arrived yesterday morning with the following passengers: F. J. Tromble, Craig; J. M. Francis, Warm Chuck; John McCullom, Calder; Frank L. Farrer and wife, Tokeken.

Dr. Pigg was summoned to the A. P. A. Cannery Monday to attend Superintendent L. E. Schott who had been injured by a fall. Upon examination the doctor found that in addition to bruises there was a rupture of a ligament between the ribs. Mr. Schott is confined to his bed.

Local and Personal

Mrs. P. C. McCormack with daughter Margaret and Peter Jr. left Thursday evening for Santa Ana Cannery where she will be the guest of Mr. and Mrs. C. R. Hanthorne.

S. K. Paul arrived in Wrangell Sunday. Mr. Paul was born and raised in Wrangell. He is now practicing law at Roselle Park, N. J. Mr. Paul is returning from a business trip to La Touche, Alaska, and stopped off in Wrangell to visit his mother, Mrs. Wm. Tamaree, who is now at Salmon Bay. Mr. Paul has not been in Wrangell since 1901, and stated that he should like to spend a few weeks in the home of his childhood, but is unable to do so. He is a member of the New Jersey National Guard, and thinks it likely that his regiment may soon go abroad.

I. C. Bjorge is making some timely improvements on the city board walks by establishing substantial corners where it is necessary to turn his auto truck. The work in question is authorized by the town council, the lumber being furnished by the city. This addition to the Wrangell streets will be a benefit to all conveyances and a natural source of civic pride.

Mrs. J. W. Stedman was surprised by a visitor on the City of Seattle while that steamer was in port this week. The lady was Mrs. W. E. Jones, wife of the passenger agent for the Pacific Steamship Co. at Tacoma, Wash., and an old friend of Mrs. Stedman's. Mrs. Jones is making the round trip from Seattle to Skagway, this being her initial journey in Alaska. Mr. Jones is well known on this route having been purser on the P. C. S. S. Co. line for fourteen years.

Miss Ruth Liphart of Chemawa, Oregon, is visiting Miss Anna Loftus of this city. She will remain in Wrangell throughout the summer vacation.

Mrs. Winnie Lidgate of Butte, Montana, was in Wrangell last week visiting her brother, Mr. M. J. Crowell, whom she has not seen for many years.

Mr. and Mrs. Oak Olsen have taken apartments at L. C. Pate-naudes. They intend to make the excursion trip up the Stikine river, at an early date.

Mr. and Mrs. B. Y. Grant and daughter returned on the City of Seattle Monday from a visit of several weeks outside.

Mrs. Julia La Bounty and daughter, Miss Olive, are visiting Mr. and Mrs. George La Bounty at Skagway.

BORN, To Mr. and Mrs. James Wheeler on Saturday, June 14, a daughter; weight 9½ pounds. Dr. Shurick reports mother and child doing nicely.

Mrs. A. B. Elmer came in with the Hanthornes last week and is spending a few days at the home of Miss Woods.

A party of dentists including Doctors F. L. and R. M. Mellor, G. Martin and R. Fox left Wrangell Wednesday afternoon on the steamer Tahltan for Telegraph Creek, B. C., where they will spend a few weeks.

The Spokane took the following passengers south from Wrangell, Sunday evening: Denver Mossy, Hans Gresdal and C. T. Gardner of the U. S. Forestry Service, for Ketchikan; Thomas Sharp, F. H. Myers and Arthur Nelson of Burnett Inlet for Seattle.

Wrangell Man Gets Patent on Fish Trap

Walter J. Larson of Wrangell this week received from the United States patent office a patent on a fish trap which he recently invented.

The invention relates particularly to floating fish traps which are used in open waters.

One of the chief objects of Mr. Larson's invention is to provide means in a fish trap of positively distending and holding distended the verticle webs of the trap, and to prevent their being displaced by currents or rough water to which they may be subjected.

Another object is to provide a trap of such form that two spillers may be used, and may be operated entirely independent of each other and of the pot.

Another object is to provide easily adjustable means for the escape of fish during such periods as it is not desired to operate the traps, on Sundays, for instance, when by law it is required that traps be not operated.

Another object of the invention is to provide means for anchoring a floating trap which will hold it securely in position, and will, at the same time, produce a minimum of strain upon the parts of the trap.

Another object of the invention is to provide means for holding the web of the leads distended and verticle, without the use of heavy weights thereon.

A still further object is to produce a floating fish trap of a strong, compact character, such as will not easily be broken up by storms to which it may be subjected.

Other objects and advantages appear as one investigates Mr. Larson's trap which is in advance of anything now in use in the line of fish traps.

RED CROSS NOTES

Red Cross members who have not received their pins can do so now by calling on Mrs. J. G. Grant who has a fresh supply.

The Red Cross membership is now over 600 and the total collections are over \$2000. We noticed in a recent issue of the Empire that the wealthy town of Juneau gave us credit for having collected only \$300 as compared with \$7000 from Gustineau channel and \$2300 from Ketchikan.

Birthday Party

Miss Irma Grant, daughter of Capt. and Mrs. J. G. Grant, played hostess at the Wrangell hotel last Thursday afternoon, the occasion being the little lady's birthday.

At 5 o'clock the guests partook of an elaborate supper, served in the hotel dining room. The menu included

Oyster Soup	Peas
Asparagus Chicken	Sweet Potatoes and Cream
Fruit Salad	Chocolate Ice Cream
Cake	

Twelve little girls were present: Margaret Pennycook, Dorothy Johnson, Margery Johnson, Constance Emery, Adele Skelton, Etolin Coulter, Thodosia Royalty, Catherine Matheson Glenn Matheson, Margaret Warren, Wilhelmina Cunningham, Gertrude Cunningham. Master John Grant Jr. enjoyed the distinction of being the only young man present.

Mrs. Robert Livesay and little son, Joye, arrived on the Spokane from Thane, Alaska. They will remain in Wrangell during the summer, occupying the Hogstrom home between Front and Church streets. Mrs. Livesay expects her sisters, Misses Lucy and Cora Haskins, a little later in the season.

TWO ENLISTMENTS FROM WRANGELL

Ellery Carlson and C. C. Davis Accepted for Service on Submarine Chasers

Two naval recruiting officers, Lieut. C. C. Clark and Lieut. Dr. R. C. Davis of the medical corps, arrived here yesterday afternoon on a government boat for the purpose of enrolling men for service on submarine chasers now being built at Bremerton.

After the theft of Lieut. Clark's papers at Petersburg the recruiting party left for Ketchikan and on this account the impression was general in Wrangell that the recruiting party would not call in here at all. Consequently several young men who came in town the first of the week for the express purpose of enrolling had gone out again. Stephen Grant who was very anxious to enroll left for Groundhog only a few hours before the arrival of the party.

Upon the arrival of the recruiting party in Wrangell Capt. J. G. Grant placed the Wrangell hotel at the disposal of Lieut. Clark as a recruiting station. A number of those presenting themselves for enrollment were turned away for various reasons, generally on account of over age.

Six physical examinations were made only two passing. They were C. C. Davis and Ellery Clifford Carlson. On account of Mr. Carlson's age it was necessary for him to have his parents' consent. This was willingly and patriotically given, the father volunteering his own services also, but was refused on account of his age.

Both of the young men who passed are prize specimens physically, and will be able to render their country invaluable service. Mr. Davis was formerly in the navy and seemed glad to get back into the service in a time of the country's need. And Ellery! He was all enthusiasm. It was probably the happiest moment of his life when he was handed a certificate showing that he had passed and had been enrolled. The two Wrangell recruits will remain here until called, which will be just as soon as the submarine chasers now being built are completed.

The recruiting party left last evening at 9 o'clock for Ketchikan via Union Bay.

Daily-Lynch.

Miss Eleanor Lynch and T. R. Daily were united in marriage by Judge Weber Sunday evening at the court house. As the wedding was intended to be in the nature of a surprise only two witnesses were present, Mr. and Mrs. H. J. Wallace.

The young people did not succeed in keeping the secret, however, and were greeted with congratulation on every side during the day following the wedding.

The bride was raised in Wrangell and has a wide circle of acquaintances in Southeastern Alaska. The groom came north from Tacoma about two years ago.

The Sentinel wishes Mr. and Mrs. Daily smooth sailing on the matrimonial sea.

Red Cross Notice.

The Red Cross ladies will meet Friday afternoon of this week in the town hall.

There is an abundance of work ready—enough keep to every member busy for many afternoons.

All are urged to attend.

Dr. and Mrs. Benawa of Craig, Alaska, left Friday evening on the Princess Alice for Denver.

Improved Weapons of Warfare Do Not Make For Greater Slaughter of Men

By HUDSON MAXIM, Noted Inventor

It may be said that for all practical considerations there is absolutely no limit to the development of inventions in any line, whether in industry or war. If we could look forward a hundred years and see the mechanism of warfare of that time we should be as greatly surprised as our forefathers of a hundred years ago would be to look upon the mechanism of war of today. FOR THERE WILL BE MADE IMPROVEMENTS AS MARVELOUS DURING THE NEXT HUNDRED YEARS AS HAVE BEEN MADE DURING THE LAST HUNDRED YEARS.

There is a very popular error of belief that improved weapons of war mean greater slaughter, while, as a matter of fact, the more deadly and destructive weapons of war become the less the slaughter. As I have pointed out many times, the old Roman short sword was actually much more deadly than the modern quick firing gun, for the reason that armies fought closer together and there was no escape for the vanquished.

At the present time the fighting is mostly done by machinery, and labor saving machinery saves life in war, just as it saves labor in industry.

THE QUICK FIRING GUN IS A LABOR SAVING MACHINE AND ALSO IS A LIFE SAVING MACHINE. TONS UPON TONS OF AMMUNITION ARE WASTED TO SLAUGHTER A CORPORAL'S GUARD.

Education of Girls Should Include Training In Home Economics

By MYRON T. SCUDDER, A. B., A. M., Educator

AN interesting development in the education of girls is the increasing attention paid to home economics. The management of the home is one of the most complex, intellectual and difficult of professions, and no one who gives thought to the subject can fail to appreciate the dignity of woman's work in the home or to realize the necessity of careful, systematic training for it.

High schools, both private and public, should provide liberally for this training and should treat in a thoroughly practical and cultural way such topics as the house, its plan, furnishing, decoration and care; household management, sanitation, food and cookery, clothing and textiles, laundering, home nursing, child study and training, recreation in the home, system, filing and bookkeeping. GIRLS THUS TRAINED MEAN HAPPIER HOMES, BETTER CHILDREN AND A MORE PROSPEROUS COUNTRY.

In planning for the wider education of girls the matter of substantial thoroughness and assiduous effort must be borne in mind. Womanhood has already suffered too much from superficial education and from brief or "telescoped" courses. Get through quick is a shortsighted, dangerous policy, a besetting sin of American girls, and boys, too, for that matter, but especially girls.

THERE IS NO SHORT CUT TO SUCCESS OF ANY KIND, AND THE HALF FINISHED HIGH SCHOOL COURSE, THE COURSE OF EASY RESISTANCE IN COLLEGE, CANNOT PRODUCE AN INTELLIGENT, EFFICIENT AND WELL POISED MEMBER OF SOCIETY.

Confirmed Criminals Should Be Permanently Removed From Society

By Dr. BERNARD GLUECK, Prison Reform Specialist

THE slogan of the modern criminologist is "intensive study of the individual delinquent from all angles and points of view" rather than mere insistence upon the precise application of a definite kind of punishment to a definite crime as outlined by statute. INDEED, THE WHOLE IDEA OF PUNISHMENT IS GIVING WAY TO THE IDEA OF CORRECTION AND REFORMATION.

This radical change of tendency cannot be looked upon as a mere misdirected sentimentality on the part of modern society, but is the inevitable result of the final conviction that the solely punitive criminology, upon which society has been relying in its efforts to eradicate criminal behavior from its midst, has proved a total failure.

If these new measures of probation, suspended sentence and parole, which are perfectly adequate in theory, are to justify their existence in the practical every day handling of the problem of criminology we must not fail to take into full account the very obvious natural phenomenon that human beings vary within very wide limits in their susceptibility to correction or reformation; that some individuals, because of their psychological makeup, either qualitative or quantitative, ARE ABSOLUTELY AND PERMANENTLY INCORRIGIBLE AND PRESENT A PROBLEM WHICH CAN BE DEALT WITH IN ONLY ONE EFFECTIVE WAY—NAMELY, PERMANENT SEGREGATION AND ISOLATION FROM SOCIETY.

MINING APPLICATION

No. 03592

United States Land Office,

Juneau, Alaska,

April 18, 1917.

NOTICE

Notice is hereby given, that the Alaska Marble Company, a corporation, duly organized and existing under the laws of the State of Maine and qualified to do and doing business as a corporation in Alaska, by William S. Bayless, its Agent and Attorney in Fact, has made application for patent to the Prince of Wales Nos. 14, 15, 18, 19 and 20 marble placer claims, Survey No. 1051, situated in the Juneau Land District, on the northerly shore of Klawack or Dry Pass, on Prince of Wales Island, about two miles from the village of Shakan, in the Ketchikan Mining District, in Tongass National Forest, Territory of Alaska, and tied to U. S. L. M. No. 5, which is a post 6 inches square, 6 feet above ground, surrounded by a mound of stone, situated on a small island in Shakan Strait, which is connected with Kosciusko Island at low water, and is referred to on U. S. C. and G. S. Charts as "Astronomical Station;" in Latitude 56° 08' 51" North, and Longitude 133° 28' 16" West, which said property is more particularly described as follows: to-wit:

PRINCE OF WALES No. 14.

Beginning at corner No. 1, on line of mean high tide of Klawack Pass, whence U. S. L. M. No. 5 bears S 15° 34' 13" W 7238.76 feet distant; thence N 34° 30' W, Var. 30° 15' E, 1094.30 feet to corner No. 2; thence N 2° 43' W, Var. 30° 00' E, 816.40 feet to corner No. 3; thence E, Var. 29° 30' E, 3530.40 feet to corner No. 4; thence S, Var. 28° 45' E, 2147.10 feet to corner No. 5; thence S 63° 18' W, Var. 29° 30' E, 672.40 feet to corner No. 6; thence S 72° 50' W, Var. 29° 30' E, 351.00 feet to corner No. 7; thence N 36° 16' W, Var. 29° 30' E, 218.60 feet to corner No. 8; thence N 1° 41' W, Var. 29° 30' E, 219.10 feet to corner No. 9; thence N 10° 35' E, Var. 30° 30' E, 298.30 feet to corner No. 10; thence S 68° 34' W, Var. 30° 00' E, 275.80 feet to corner No. 11; thence S 81° 52' W, Var. 30° 00' E, 351.60 feet to corner No. 12; thence N 44° 01' W, Var. 30° 00' E, 173.00 feet to corner No. 13; thence S 59° 59' W, Var. 30° 15' E, 396.00 feet to corner No. 14; thence N 3° 35' E, Var. 29° 30' E, 347.30 feet to corner No. 15; thence S 80° 40' W, Var. 30° 15' E, 177.10 feet to corner No. 16; thence N 76° 02' W, Var. 29° 30' E, 209.80 feet to corner No. 17; thence N 15° 34' W, Var. 30° 15' E, 117.30 feet to corner No. 18; thence S 77° 43' W, Var. 30° 15' E, 454.40 feet to corner No. 1, the place of beginning. Containing an area of 153.492 acres.

PRINCE OF WALES No. 15.

Beginning at corner No. 1, identical with corner No. 5, Prince of Wales No. 14 placer of this survey, whence U. S. L. M. No. 5 bears S 36° 21' 16" W 8123.12 feet distant; thence N, Var. 28° 45' E, 2147.10 feet to corner No. 2; thence S 89° 02' E, Var. 29° 00' E, 2637.00 feet to corner No. 3; thence S, Var. 28° 00' E, 1926.80 feet to corner No. 4; on line of mean high tide of Klawack Pass; thence S 71° 31' W, Var. 28° 30' E, 1651.00 feet to corner No. 5; thence S 59° 50' W, Var. 28° 45' E, 456.20 feet to corner No. 6; thence N 88° 26' W, Var. 29° 00' E, 262.50 feet to corner No. 7; thence N 55° 43' W, Var. 29° 30' E, 403.40 feet to corner No. 8; thence N 13° 17' W, Var. 29° 30' E, 352.20 feet to corner No. 1, the place of beginning. Containing an area of 143.162 acres.

PRINCE OF WALES No. 18.

Beginning at corner No. 1, identical with corner No. 4, Marble Creek No. 7 placer, Survey No. 542, whence U. S. L. M. No. 5 bears S 3° 48' 05" W 9791.86 feet distant; thence N 1° 50' E, Var. 29° 30' E, 633.30 feet to corner No. 2; thence N 86° 35' E, Var. 29° 30' E, 1364.90 feet to corner No. 3; thence S 6° 09' E, Var. 29° 30' E, 601.00 feet to corner No. 4; thence S 85° 58' W, Var. 29° 30' E, 1398.00 feet to corner No. 5; thence S 70° 47' W, Var. 29° 30' E, 56.00 feet to corner No. 1, the place of beginning. Containing an area of 19.658 acres.

PRINCE OF WALES No. 19.

Beginning at corner No. 1, identical with corner No. 2, Prince of Wales No. 20 placer of this survey, whence U. S. L. M. No. 5 bears S 4° 45' 56"

COOLNESS

There's nothing so cool as an oil stove for summer cooking. All the heat is concentrated on the cooking and not radiated about the kitchen.

Cooks everything any wood or coal range will cook, and cooks it better, because of the steady, evenly-distributed heat.

Use it all the year 'round—more convenient than a wood or coal stove, and more economical.

The long blue chimneys prevent all smoke and smell. In 1, 2, 3 and 4 burner sizes, with or without ovens. Also cabinet models. Ask your dealer today.

SCOTCH METHOD

Interesting Description of the Scotch Cure for Herring

Frequent mention of the Scotch cure for herring now being demonstrated throughout Alaska has caused natural inquiry regarding this new method, and those materially interested in this new industry will appreciate the difference in this treatment of the food fish as taught by Aug. H. D. Klie in this territory.

Only the fresh herring are desirable for cure. As soon as the fish is received at the stations it is dumped into a farland (a box about ten feet long and five feet wide and three feet high with open cracks in the sides and bottom to facilitate the escape of blood and other liquids), great care being taken that they receive a good sprinkling of salt as they slide out of the fish baskets.

Gibbing is the next step. In this process the gills and gutbag are entirely removed, but not the milk or roe.

As the herring are gibbed they are dropped into baskets placed conveniently at the side of the gutter for the various sizes and selections of which there are usually four, viz: "large fulls," "fulls," "mat fulls;" and "matties." Toward the end of the season a separate selection is made for "spents" or spawned herring which should never be mixed with the regular cure. Selecting or grading the herring according to their size is done chiefly by touch and not by eye measurement.

Perhaps the most particular work is "rousing." This is where art enters into business and special skill is required. First the gibbed or gutted herring is dumped into large tubs sufficient to pack a regular Scotch barrel, where they receive a very thorough sprinkling and mixing of salt. This is really the secret of Scotch curing, and particular attention must be paid to it, so that the herring are so well covered on both sides with salt, that the skin of one does not come into direct contact with its neighbor when packed in the barrel. Salt must not be stinted when used for this purpose and energy is required as there is a tendency to spare the hands from the harsh salt.

Alaska herring sometimes eat quantities of what is generally known as "red feed." This is a form of minute sea-life, abundant in certain localities. The herring when gorged with red feed are unfit for cure. A haul found to contain this feed naturally discourages the inexperienced packer, but a remedy for the situation is known to Mr. Klie. If the net is allowed to remain for a time in the water the fish finally disgorge themselves after which action they are ready for cure.

After witnessing a demonstration of the Scotch cure at Juneau by W. P. Studdert of the Bureau of Fisheries a Juneau dealer placed an order with Jacob Johnson of Port Conclusion for a number of barrels of Scotch cured herring for local consumption.

Mr. Studdert advises that his work has been most encouraging in the Northern field and judging from the present outlook many concerns will take up the Scotch method this season.

Any one desiring instruction in the curing of herring by the Scotch method will apply to Mr. E. P. Walker, as Mr. D. R. Crawford is now stationed here to demonstrate the Scotch cure to those desiring to pack herring according to this method.

New Postal Regulation

"Insurance tags will no longer be attached to parcels." This new order governing the Postal Service in regard to Parcel Post took effect July 1. Receipts from addresses are not required on delivery, according to the new system, but even greater care will be taken in handling parcels on which insurance has been paid.

The actual value of the contents must appear on the package wrapper, where number and further details will be copied by the clerk. When parcels are presented for insurance senders should advise those in charge of the nature of the contents. The wrapper can then be marked with rubber stamps provided for that purpose, "Perishable," or "Fragile," as the case may be.

The receipt given to senders will remain ostensibly the same, as at present it carries all particulars necessary for tracing lost parcels.

As a measure of economy postmasters are directed to encourage the public to use stamps of the highest denomination suited to amount of postage required on all mail. For example, a 2 cent stamp instead of two 1 cent stamps should be affixed to letters needing two cents postage; and a 10 cent stamp instead of two 5 cent stamps, used on articles requiring ten cents postage. Cooperation between post-office employees and the public in the sale and use of stamps of the higher denominations will effect a large saving to the government in the cost of producing, transporting and cancelling them.

The Petersburg saw mill, formerly owned by the Pacific Coast & Norway Packing Company, has passed into the hands of Scow Bay parties.

For Sale.

One 40-foot sein boat 18 h.p. N. and S. engine. Complete \$500.

A Correction

Mr. Klie, special assistant of the U. S. Bureau of Fisheries, introducing the method of curing herring Scotch style, called our attention to the article appearing in our last issue stating that "The ingenious Scotch people prepare a delicious dish from the gills of the herring." Such a statement is, of course, absurd. Mr. Klie called attention to the fact that there is no waste whatever in curing herring in Scotland and that even the gills, gib and gut are utilized in the manufacture of fertilizer and oil.

NATURE'S COMPENSATIONS.

When One Sense Is Dulled Another Faculty Is Awakened.

As we get older (oh, the pity of it—before we leave the grammar school!) one or more of our faculties of sense begin to fail.

Few people know how to smell. Most children have spectacled eyes. Few more than thirty-five years can hear well, and few possess sensitive fingers.

Eyes constantly raised to blackboards or bent upon the printed page or working under electric lights are overstrained. Outdoor seeing gives a more varied and less tasked exercise of sight. At least one day in the week we can relieve monotonous study or labor with a new and restful outlook.

Pleasure in using our five senses keeps them in good working order. People who can be intensely interested in their labor seldom feel a strain.

Our dulled faculties become so much from lack of use and lack of pleasure in use as from overwork.

But there is always a compensating gift if for any reason one or more faculties have become dull. The deaf one sees the keener. The dim sighted person generally hears like a lynx or smells with the nose of a dog. Nature always brings about this sharpening of one sense if another sense is slow. Insects, animals, birds, usually have not more than one sense made marvelously keen to outwit and survive danger. The coyote does not see extra well. The hawk does not hear extra well. The snake neither hears nor sees above ordinary power, but with the whole length of his body he feels an infinitesimal vibration.

If an animal becomes deaf or blind on one side he develops another sort of sensitiveness on that side of his body. He feels when he cannot see or hear on one side. Often he is quicker to perceive on his blind or deaf side than with his normal organs.—Virginia Ballen in San Francisco Bulletin.

Underground Mountains.

A curious result of operations by the trigonometrical survey in India was the conclusion that there was in the middle of India an underground or buried mountain range a thousand miles in length and lying about parallel with the chain of the Himalayas.

This conclusion was based on the singularities of the local attraction of gravitation in central India, the plumb line being deflected southward on the north side of the supposed subterranean chain and northward on the south side, leading to the inference that a great elongated mass of rock of excessive density underlies the surface of the earth between the two sets of observing stations.

Getting Out of It.

Constable, the English painter, attended an exhibition of landscapes and sea views which was the work of another eminent artist whom he detested. "Like putty," he growled as he scanned them over. It happened that a friend of the painter's was present and was so stupid as to repeat Constable's remark. When, later, Constable, meeting the gentleman whom he had condemned, congratulated him upon one of his works, the latter said, "Why, I am told you say my pictures are putty." "What of that?" replied Constable. "I like putty."

Cloud Colorings.

The blue color of the sky is owing to floating particles of invisible dust that break up and scatter the short waves, which are the blue waves, of light. This occurs principally at a great elevation, where the atmospheric dust is extremely fine, while in the lower regions of the air, where the dust is coarser, the scattering affects all the rays, or colors, alike. The brilliant fringes of clouds, seen nearly in the direction of the sun, are largely due to dust, which especially accumulates in the neighborhood of clouds and refracts the sunlight around their edges.

Lamb Didn't Like Byron.

So we have lost another poet. I never much relished his lordship's mind and shall be sorry if the Greeks have cause to miss him. He was to me offensive, and I can never make out his great power which his admirers talk of. Why, a line of Wordsworth's is a lever to lift the immortal spirit. Byron's can move only the spleen. He was at best a satirist. In any other way he was mean enough. I dare say I do him an injustice, but I cannot love him nor squeeze a tear to his memory.—Writings of Charles Lamb.

FAMOUS LAST WORDS.

Napoleon in His Dying Delirium Recalled His Early Triumphs.

We listen with bated breath to the last words of dying people. Why we do it is difficult to explain. Can we expect a revelation of truth from a brain disorganized by illness and agony? The dying man still belongs to this earth. He is still fettered by bonds of flesh, still weighted down by the burden of the body. If we were being guided by an inexorable logic we should declare that these last utterances are without any value.

There is a popular theory that in his last moment the moribund sees his whole life spread out before him like a panorama. So we hope against the objections of reason that our dying relative or friend may let us share this moment of enlightenment and give us the meaning of life in an epigram.

Pericles encompassed the meaning and value of life in one sentence, "On account of me never an Athenian had to put on mourning." In myth and legend great men die according to their lives and characters.

Napoleon had at first a solemn leavetaking, during which he talked like an actor: "I have done justice to all fundamental truths. * * * Be faithful to the glory we obtained!" Then he became feverish, and he called up the generals, the old ones, not those of the later epoch: "Desaix, Massena, ah! * * * the moment is decisive * * * hurry up, push on, attack * * * France in arms * * * at the head of the army." * * * No poet could have done better.

Frederick the Great was working to the last minute. His last words, spoken in French, were: "La montagne est passe * * * nous irons mieux" (We have reached the top of the mountain, now it will go better).

William I. one day before his death, when he gave his last signature, said, "I have no time to be tired," and these simple words are confirmed by the life that preceded them.

The other pole is marked by Nero's "Qualis artifex pereo!" (What an artist dies in me!).

Mazarin, with a last glance at his gallery of pictures, sighed, "Faut-il done quitter tout cela?" (Must I really leave all this?). A characteristic Italian expression.—Edward Goldbeck in Chicago Tribune.

Making Themselves Known.

"Persons who expect to receive money orders in a strange town take infinite precautions to identify themselves," said a postal clerk. "One way that particularly commends itself is for the stranger to call on the paying teller in the money order department before his own order arrives and present a bunch of correspondence showing pretty clearly who he is. He then explains that he is expecting a money order from a certain person. Can the clerk remember him when he presents it for payment? After that impressive introduction the clerk usually can remember, and when the order is presented he cashes it."—New York Sun.

Uncut Books.

"Uncuts," said the book dealer, "are books with uncut edges. They originated in Scotland. In Scotland, in the past, a man would enter your shop today, read a chapter of some book or other and saunter out without buying anything. Tomorrow he would read another chapter gratis, and by the end of the month he would have finished the volume and be well into another. "Hence the Scottish publishers and booksellers hit on the uncut, which you can't read without buying."

Chinese Birthdays.

A Chinese child is considered a year old at its birth, and its age is reckoned not from its birthdays, but from its New Year's days. If it is fortunate enough to be born on Feb. 1, the day before the Chinese New Year's day, it is said it be two years old when it is two days old. It is one year old when born, and another year is added on its first New Year's day.

Baby Seals.

When seals are born they are snow white, which makes them invisible on the ice. Their eyes and noses are, however, black, and when the little ones are suddenly alarmed they close their eyes, bury their noses and lie quite still. It is only when they begin to seek their own food that they become dark and sleek.
